

## QuadJack

Transport at optimal clarity - Westell's compact fiber multiplexer designed to transport up to four (4) DS1 lines over a single-mode fiber pair to distances up to 27 miles.

- \* Flexible Central Office system shelf for protected & unprotected systems
- \* 24 or 48 volt powering - positive or negative
- \* Compact
- \* Overhead telemetry channel for remote site alarms
- \* Temperature hardened
- \* Autonomous TL1 alarms
- \* Self diagnostics

The benefits are:

- \* Allows quick and easy deployment of DS1 services where fiber exists
- \* Powerful 22dB optics can reach locations difficult or expensive to reach by other means
